

Woolworthless Eviction Notice

08-04-2006 - 100s of Maleny residents rallied today to be banned from Woolworths stores and serve their eviction notice on the unwanted supermarket.

Woolworths stores everywhere now use face-recognition technology in conjunction with security cameras to keep track of all who pass through the doors.

It is just a matter of time before Woolworths realizes that the Maleny store is the most expensive mistake they have ever made and leave.

Meanwhile it is a shopping alternative for curious out-of-towners who think they might like being watched, scanned, searched and scrutinized.

Shop at Woolworths? - Computer says "noooo"
